

GOANDSTOP® RACING 2010 DIGITAL GEAR INDICATOR

PRODUCT DESCRIPTION

- Shows current gear number
- Indicates current gear from 1 to max. of 8, as well as a neutral indicator
- Auto programming
- Compatible with all motorbikes, four wheelers, bikes etc. - will fit anything with a shift lever
- Red/Blue illuminated display will automatically dim at night
- Detects the current gear faster than other gear indicators that use speedometer/tachometer signal
- Display can be mounted anywhere

HOW IT WORKS?

A small magnet mounted on the gear shift lever which moves past the upshift and downshift sensor as shifts occur.

The shift signals are then sent to the display, where the current gear number is shown.
